

NEW PLAY AREA IN MILAN BERGAMO AIRPORT DEPARTURES TERMINAL

The Milan Bergamo Airport has renovated its play area within the Schengen flights departures terminal, making it more appealing, relevant to the air travel theme, and with a greater choice of activities.

The play area is located on the inner west side, at the end of the walkway that crosses the shopping area and leads to the gates. It includes an entrance turret, marked by nets, which connects the ground and upper floor.

The upper floor, which consists of an aeroplane fuselage, is upholstered with soft themed panels and fitted with mechanical play panels and distortion mirrors. The fuselage includes a pilot's cockpit with a Captain inside. When you have passed through this area, you can make your way to the exit via a slide.

The ground floor, like the upper floor, is equipped with mechanical wall panels; a series of hands-on and logic games that will entertain little ones and stimulate their curiosity and skills.

Since the very first hours of its opening, the play area (created with contributions from the Cycloband brand) has drawn interest from numerous children travelling with families and is a highly valued attraction for those waiting to take flight.
