SACBO OPENS A NEW CUSTOMS GATE AT MILAN BERGAMO AIRPORT

From today, the new Customs Gate 1, for pedestrian and vehicular use, starts operating. It is located on the south-eastern side of the airport, on the last section of the road Via Orio al Serio, in the Municipality of Grassobbio, where the SACBO management office building is located.

The customs gate, which was previously situated in the area between the terminal and the control tower, will be used just for emergency access to the airport's sterile area.

The new customs gate is a state-of-the-art structure in the field of Italian airports, with very high levels of protection provided by Security equipment certified by the most important international organisations, guaranteeing the access control system.

The customs gate comprises the building hosting the Entrance Management Office, the airport management company's new surveillance Control Room, and the emergency operations centre, with technological systems compliant with the most stringent international standards.

The new customs gate makes it possible to relocate vehicular traffic that is not linked to passenger movements, thus facilitating user access to the airport.esto
