

## Results for the first semester 2016: net profits +28.5%

The Board of Directors of SACBO, during a meeting in the management offices in Grassobbio, analysed the data for the semester which indicate a significant increase in passengers of 6.7% compared to last year, with an overall total of 5,242,919 from January to June 2016 (compared to 4,913,750 passengers registered in the first semester of 2015).

Faced with an 8% reduction in the movement of air freight, a substantial conservation of the value of logistic activity connected to the transportation of merchandise by air has been recorded, despite a fall from 60,483 tonnes to 57,185 tonnes (-5.5%).

The operative results for the first semester of 2016 see the reaching of objectives set with regards to economic and financial budgeting. The value of production as of 30.06.2016 is 59,872 million (+7.4% compared to the first semester of 2015), with a resulting net profit of 6,792 million, corresponding to a growth of 28.5%. The positive variation of results for the period is particularly due to the excellent performance of new commercial activities which were set up last financial year together with the expansion of the airport.
